Office Action Summary

Art Unit: 1652

Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, 14 (in-part), 17 (in-part) & 21, drawn to a first method of making a stabilized protein by selecting one or more residue pair using a statistical criteria, a protein cross-linked by the first method and composition comprising the cross-linked protein classified in class 424, subclass 193.1.
 - II. Claims 10-13, 14 (in-part), 15-16, 17 (in-part), & 18-20 & 22 drawn to a second method of making a stabilized protein selecting at least one or more tyrosine residue pair and a protein made by the second method comprising at least one di-tyrosine cross-link, classified in class 424, subclass 194.1.
2. The inventions are distinct, each from the other because of the following reasons:

The methods of Inventions I and II require different products and steps and have different endpoints. Therefore, Inventions I, and II are patentably distinct.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to on to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1652

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventor ship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
